
Open Metadata Documentation

Release 0.6

Marcus Ottosson

May 15, 2014

1	Indices and tables	3
----------	---------------------------	----------

Open Metadata is a cross-platform hierarchical [metadata](#) format for storing and accessing any [format](#) via any [protocol](#) of unlimited size and complexity. The code is open source and is [available on GitHub](#).

The documentation is organized into the sections below.

Contents:

Indices and tables

- *genindex*
- *modindex*
- *search*
